As a guitarist who's worked with everyone from David Lee Roth to k.d. lang to Marilyn Manson, John 5 requires a broad palette of sounds to best express his eclectic tastes. He always finds the right shades with Aphex' **Punch Factory™** and **Guitar Xciter™**. They offer the clarity, power, and tremendous range of sound that innovators like John 5 need. And since both pedals double as high-quality DI boxes that can run on phantom power, they're as useful on stage as they are in the studio.

Are you ready to expand your range of tonal possibilities? Visit www.aphex.com for interactive demos on all of our Xciting new professional processing pedals.
